MODAR ALHARIRI

FULL STACK WEB DEVELOPER

Amman, Jordan | [+962780600746] | [modaralhariri264@gmail.com]

LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full Stack Web Developer focused on building responsive, user-friendly web applications using modern frontend and backend technologies. Skilled in HTML, CSS, JavaScript, PHP, and MySQL, with a growing focus on React.js, Laravel, and RESTful API integration. A proactive problem-solver with a strong learning mindset, attention to detail, and commitment to writing maintainable code and delivering practical solutions.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), Bootstrap, React.js
Backend: PHP, Laravel, Object-Oriented Programming (OOP), RESTful APIs
Databases: MySQL, SQL, Database Design, CRUD Operations
Tools: Git, GitHub, Postman, Visual Studio Code
Core Concepts: Responsive Web Design, DOM Manipulation, API Integration, Debugging, MVC Architecture, Version Control

PROJECTS

Thikra – Memories Website - In Progress
Technologies: React , Material UI , Laravel , MySQL , REST API

- A project aimed at creating a **digital memory book** through which messages and memories can be collected from friends and close people.
- Applied responsive design principles to provide a consistent browsing experience across screen sizes.

Personal Portfolio Website
Technologies: HTML5, CSS3, JavaScript

- Built a responsive personal portfolio website to showcase technical skills, projects, and professional information.
- Implemented dark/light theme switching, Arabic/English language toggling, and dynamic content updates using JavaScript.
- Applied semantic HTML, CSS Flexbox, and media queries to improve usability across screen sizes.

Live Demo

Todo List Application
Technologies: React, JavaScript, Local Storage , Material UI

- Developed an interactive task management application to create, display, update, and delete tasks.
- Used React event handling and States manipulation to manage task interactions dynamically.
- Designed a clean, responsive interface to support task organization and usability.

GitHub | Live Demo

Pray Time Website
Technologies: HTML5, CSS3, JavaScript, RESTful APIs

- Developed a web application to display Islamic prayer times using an external API.
- Integrated API responses with the user interface to display prayer schedules dynamically.
- Designed a responsive layout to make prayer time information accessible across devices.
